

Skin Care Plan – MP HandCareSystem

MP Schutzlotion PL-3300

MP Schutzlotion PL-3300 is a silicone-free skin protection salve that is used when handling with frequently changing harmful substances. MP Schutzlotion has a dual action principle which is also effective in case of not clearly definable affecting noxious substances. PL 3300 helps to protect the skin against oil-based and water-based working materials or other skin irritations. This oil-in-water-emulsion is free from silicone oil and doesn't leave residue or marks on work pieces and tools. MP Schutzlotion is applied thoroughly before start of work and after breaks on previously cleaned skin (particularly on vulnerable skin areas, e.g. between the fingers and on the fingernails). This skin protection lotion is clinically tested.

MP Handreiniger HC-3600

HC-3600 is a silicone-free, pH skin neutral, paste-like top class hand cleanser with a highly effective cleansing performance to remove 2K or 1K varnishes, paints, glues, resins, bitumen and many other usually difficult-to-remove contaminants. MP Handreiniger is perfectly suitable for varnish and paint processing companies because it contains a special natural scrubbing agent. In order to achieve the maximum effectiveness of the product do not moisten your hands before using the hand cleanser. The dirt is rubbed off with the paste-like MP Handreiniger, then add a little water and continue the cleaning process. Finally rinse well with clean running water. This special hand cleanser is clinically tested.

MP Pflegelotion CL-3900

MP Pflegelotion CL-3900 is a special silicone-free and moistening (panthenol and allantoin) oil-in-water emulsion and has been especially developed to regenerate occupationally stressed skins. MP Pflegelotion is easy to apply, swiftly absorbed and does not leave an annoying greasy film. MP Pflegelotion is perfectly suitable for varnish and paint processing companies. Apply MP Pflegelotion regularly after work and after cleansing. This lotion has anti-inflammatory properties and accelerates the healing of wounds. This special hand lotion is clinically tested.

MP HandCareSystem

Protection against heavy, changing contaminations MP Schutzlotion PL-3300

- universal skin protection cream
- with dual action principles
- protects the skin against softening
- anti-inflammatory properties
- silicone-free

MP Schutzlotion PL-3300 protects the skin against oils and organic solvents and reduces considerably the penetration of paint thinners and of other solvent-based working materials into the epidermis and thus also the adhesion of paints, graphite, metal-dust, grease, adhesives and resins.

- Available in
- 1000 ml bottle

Special hand cleanser for painter MP Spezialhandreiniger HC-3600

- paste-like hand cleanser with natural scrubbing agents
- removes varnishes, resins, glues, paints, bitumen, etc.
- regulates the skin's lipid balance
- silicone-free

Particularly well tolerated by the skin, the special hand cleanser MP Handreiniger HC-3600 has been developed to remove heavy and stubborn contamination (also in the fingernail beds) - such as stains of oil paints, one- or two-component lacquers, resins and adhesives. Especially adapted to the paint industry.

- Available in
- 250 ml tube
 - 1000 ml bottle
 - 2000 ml soft bottle
 - 10 l can

Care for occupationally stressed skin MP Pflegelotion CL-3900
