

# Mipa PU 242-90W

**2K-PU-HC Topcoat glossy**

**Mipa PU 242-90W** is a white base for the Pro Mix® Industry mixing system. With excellent coverage, the high-quality 2K polyurethane acrylic paint is particularly suitable for painting commercial vehicles, facade components, heavily used machinery and constructions. With only 10% tint addition, an even higher colour accuracy can be achieved for white and pastel shades.

- excellent coverage
- high UV and weather resistance
- high chemical and mechanical resistance
- scratch resistant
- electrostatic spraying possible
- optimized setting for Airmix application
