Professional Coating Systems

Mipalin - The true classic

Mipalin is a high-quality topcoat based on synthetic resin. It is especially adapted to coat easily machines, agricultural vehicles and large vehicles.

Das Mipalin synthetic resin range

Mipalin KH-Kunstharz-Decklack

Available as ready-mixed topcoat in 120 colours and in 1l or 5 l container, including many RAL and agricultural engine colours. More than 10 000 colours can be created additionally by the mixing system. Also unusual colours as well as other qualities and glosses can be produced quickly in appropriate quantities.

Mipalin FG-Spezial-Chassislack

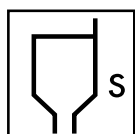

Particularly resistant special high-build paint for high-quality chassis coatings. Six standard colours available, individual colours can be created by means of mixing system.

Mipa Härterverdünnung

Can be added instead of thinner Mipa Verdünnung UN or UN 21, leads to fast drying and high surface hardness

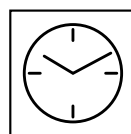

Mipa Grundierungen

Quality already starts with substrate pre-treatment. Mipa Primer, Mipa Grundierfiller BZ and other high-quality 1K and 2K primer provide an optimal solution for all kind of substrates. Fast drying, high resistance and excellent overcoatability are guaranteed.

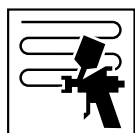

spray viscosity

air: 18-22 sec. (10-20% thinner)
airless: 40-50 sec. (without thinner)

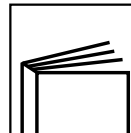

drying at 20°C

dust dry: 30-60 min.
set to touch: 6-8 hours
completely cured: 24 hours

spray application

	<i>air</i>	<i>airless</i>
nozzle:	1,3-1,5mm	0,28 mm
pressure:	4-5 bar	120-150 bar
number of coats:	2	1 ½-2
